# Fourth Semester B.A. Degree Examination, August 2022

## First Degree Programme under CBCSS

#### **Economics**

#### **Core Course IV**

EC 1441 : BASIC TOOLS FOR ECONOMICS I

(2015 & 2018 Admission)

Time: 3 Hours

Max. Marks: 80

#### SECTION - 1

Answer in one or two sentences. Attempt all questions.

- 1. Continuous Variable
- 2. Optimisation
- 3. Cross price elasticity
- 4. Identity matrix
- 5. Cubic function
- 6. Partial differentiation
- 7. Parameter
- 8. Co-factor matrix
- 9. Indefinite integral
- 10. Consumer surplus

 $(10 \times 1 = 10 \text{ Marks})$ 

### SECTION - II

Answer any eight questions not exceeding one paragraph. Each question carries 2 marks.

- Explain the slope of a linear function.
- 12. Given the total cost function  $C = 6x + \frac{1}{3}x^2 + 3$ , where 'x' is the units of output produced, find fixed cost and marginal cost.
- 13. Find  $\int (4x-6) dx$ .
- Differentiate diagonal matrix and scalar matrix.
- 15. Find price elasticity of demand at p = 2 for the linear demand function P = 8 0.5q where 'p' is the price and 'q' is the quantity demanded.
- 16. Solve  $x^2 + 3x 10 = 0$  by applying the method of factorisation.
- 17. Find the value of x at which the function  $y = 2x^3 3x^2 + 7$  can have a maxima/minima.
- 18. Explain cubic function with an example.
- 19. Find determinant of matrix  $A = \begin{bmatrix} 6 & -2 & 0 \\ 2 & 5 & -1 \\ 1 & 4 & -3 \end{bmatrix}$ .
- 20. What do you mean by logarithmic function.
- 21. Explain Elasticity of demand.
- 22. Find  $\frac{\partial y}{\partial x}$  given the function  $y = x^3 2x^2y + y^3 4$ .

 $(8 \times 2 = 16 \text{ Marks})$ 

## SECTION - III

Answer any six questions not exceeding 120 words. Each question carries 4 marks.

23. Find AB where

$$A = \begin{bmatrix} 2 & -4 \\ 5 & 3 \end{bmatrix} B = \begin{bmatrix} 6 & 1 \\ -2 & -8 \end{bmatrix}$$

24. Find the adjoint of

$$A = \begin{bmatrix} 4 & -3 & 1 \\ 2 & 0 & 5 \\ -6 & -4 & 7 \end{bmatrix}$$

- 25. Explain major applications of integration in economics.
- 26. Find the total differential of  $z = 12x^2 + 10y$
- 27. The demand function for good X is Q = 30 0.4P. Let the total cost of production of X is given by the function  $C = 120 + 1.25Q^2$ . Obtain the level of output at which firm maximises its profit.
- 28. Describe various functions used in economic modelling.
- 29. Prove that the condition  $A^{-1}A = AA^{-1}$  is satisfied for the square matrix  $\begin{bmatrix} 2 & 5 \\ -3 & 4 \end{bmatrix}$ .
- 30. What are the properties of determinants?
- 31. Write a note on Rank of a matrix.

 $(6 \times 4 = 24 \text{ Marks})$ 

## SECTION - IV

Answer any two questions not exceeding 4 pages. Each question carries 15 marks.

32. Solve the given system of equations using Cramer's rule.

$$2x + y - z = -2$$

$$x + 3y = 7$$

$$2y + 2z = 8$$

- 33. Optimise the function  $y = 3x^3 + 6x^2 5x + 2$  and state whether the function has both maxima and minima.
- 34. Write an essay on the economic application of Differential calculus.
- 35. Explain the role of mathematics in economic analysis.

 $(2 \times 15 = 30 \text{ Marks})$
